*"However difficult life may seem, there is always something you can do and succeed at."*

*Stephen Hawking (1942-2018). British Physicist and Author*

### IN MEMORIUM

**Maestro EKS says: "Stephen Hawking is often described as the 'smartest man alive,' and his immense achievements despite his physical disability is an inspiration for all of us."**

"World renowned physicist Stephen Hawking passed away yesterday on March 14th at age 76. The British scientist was famed for his work with black holes and relativity, and wrote several popular science books including *A Brief History of Time*. At the age of 22 Hawking was given only a few years to live after being diagnosed with a rare form of motor neurone disease. The illness left him in a wheelchair and largely unable to speak except through a voice synthesiser. Professor Hawking was the first to set out a theory of cosmology as a union of relativity and quantum mechanics. He also discovered that black holes leak energy and fade to nothing - a phenomenon that would later become known as Hawking radiation. Through his work with mathematician Roger Penrose he demonstrated that Einstein's general theory of relativity implies space and time would have a beginning in the Big Bang and an end in black holes."
